

List of problems I resonate with!

- A Line of symmetry in human body?
- A product lies amid cross and dot?
- Anomalous magnetic dipole moment?
- Any betterment of h-index?
- Arrow or cycle of time?
- Can we cure Relativistic quantum mechanics?
- Cantor's continuum hypothesis and Godel incompleteness theorem?
- Did we hear, what Heisenberg indented to comment about “observable and unobservable”?
- does next force await realization?
- Does of acceptance of existence Magnetic monopole awaits novel shift in conventional POV?
- Does radioactivity nature and binding energy related?
- Euler polygon formula and Phase rule by Gibbs; Why resemblance?
- Extra dimensions of space and time?
- Graviton or non?
- He explained photoelectric effect then who explain Sonoluminescence?
- Hey, revision in the definition of electric current?
- Hey, why not the expected dip in Galaxy rotation curve?
- How an electron sees ‘that level’ is vacant?
- How simple sweet gravity at quantum level?
- I don’t know Cosmological constant?
- If 0 is neither negative nor positive than Which size is neither small nor big- a unit scale?
- Inverse cube law is that much useful?
- Is coool or hott? The Relativistic temperature.
- Is the concept of imaginary time only a mathematical construct or has any physical worth?
- Is the standard model complete?
- Mixing Pigments vs mixing light rays?
- Neutrino-Neutrino-Neutrino?
- Origin of mass and electric charge?
- Riemann Hypothesis, where are zeros?
- The famous Coronal Heating Problem?
- The negative pressure?
- The pattern of Prime numbers?
- The problem of Navier-stroke
- Uncertainty principle of classical phase variables?
- Uncertainty-Four Vectors-Conservations-Generator Parameter etc.?
- What about the spacetime being continuous or discrete?
- What if joining gravitation and electrostatics interactions
- What should be the mathematical rigor or sets of axioms of Quantum field theory?
- What’s like Perturbative Quantum?

Quester: Roshan Raj
Contact: kaalkritonline@gmail.com

- When it collapsed- QM measurement?
- Why universal constants appear and are they all proportionality constants only?
- Yang–Mills theory with a finite mass gap exist?

...
